Restriction to one of the following inventions is required under 35 U.S.C. 121:

Page 2

- I. Claims 1-17, drawn to a method of measuring a device under test with calculation of error coefficients, classified in class 324, subclass 601.
- II. Claims, 18-33 and 52-70 drawn to a method and apparatus for calculating forward and reverse error coefficients, classified in class 324, subclass 638.
- III. Claims 34-51, drawn to an apparatus for measuring a device under test using calibration standards, classified in class 324, subclass 630.
- IV. Claims 71-72, drawn to methods for obtaining S-parameter characteristics of reflect, line, and through calibration, over a range of frequencies classified in class 324, subclass 602.

Inventions I, II, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility from inventions II and IV such as but not being limited to correcting systematic errors to yield a corrected S-parameter matrix. In the instant case, invention II has separate utility from inventions I and IV such as but not being limited to calculating forward and reverse tracking coefficients based upon results from using a boundary condition where the argument of the tracking coefficients are zero at DC. In the instant case, invention IV has separate utility from inventions I and III such as but not being

Art Unit: 2858

limited to measuring S-parameters over a range of stimulus frequency. See MPEP § 806.05(d).

Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it does not calculate ten error coefficients for the at least two measurement ports. The subcombination has separate utility such as being used for performing specific data processing error analysis.

Claim 1 link(s) inventions I and III. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claim 1. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeff Natalini whose telephone number is 571-272-2266. The examiner can normally be reached on M-F 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eddie Lefkowitz can be reached on 571-272-2180. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
